## Student Election Draws Record Turnout

# VALLEY STAR

LOS ANGELES VALLEY COLLEGE  
Vol. XIV, No. 28 Van Nuys, California Thursday, May 16, 1963

### 1200 Ballots Cast, Easton Wins Easily

BY BOBBI WAGNER, News Editor

Student apathy was absolved last week as Valley College students turned out in force to cast a record 1200 votes.

Jack Easton garnered a lion's share of the votes and claimed the presidency by defeating his opponents 665 to 251 for Flo Jar-mula and 178 for write-in candidate Lee Hutson.

The previous high total for an election was last spring when Dave Hinz was elected to the presidency with the total election vote being 993.

The election this semester was highlighted by spirited campaigns by all candidates and dulled by questionable activities of the election committee.

Jan Yacobellis defeated Sid Craig in a run-off which saw her emerge as the first woman vice president in the history of the college. Miss Yaco-

## PhoneCall Highlights H.S. Day

A press conference, via direct-line telephone with Peter P. Muirhead, U.S. assistant commissioner of education in Washington, D.C., will be the feature of today's Beta Phi Gamma annual High School Journalism Day.

Over 200 high school journalists from Los Angeles and the San Fernando Valley will interview Muirhead, who is in charge of program and legislative planning, during a half-hour question and answer telephone conference.

Linden Crow, player-coach of the Los Angeles Rams, and Chuck Benedict, their chief publicist, will be interviewed by high school sports writers on the outlook for the Rams in the next season.

Writing competition in news, feature and editorial divisions are to be written from information gathered during the telephone interview, while a sports competition is planned, based upon the sports press conference.

Awards are being given for the first, second, third and honorable mention stories in each classification. Trophies, donated by the Van Nuys News and Green Sheet and the Valley Times Today will be awarded to the best newspaper and the best photography in separate send-in contests.

Judges for the writing competition have been selected from among top journalists in the Valley. News stories will be judged by Jerry Burns and John Millrany of the Valley Times Today; features are being judged by Linda Elvea of the Valley Times Today and Ken Fanucci of the San Fernando Sun; editorials will be judged by Peter Grant of the Los Angeles Times and Haig Keropian of the Van Nuys News and Green Sheet; and sports stories will be judged by Dave Wright of the Valley Times Today and Marshall Klein of the Los Angeles Times.

For students not competing in the four on-the-spot contests, seminars, run by Valley College journalism majors, are being staged. Seminars in Newspaper Editing, with Dave Siddon of the Valley Times Today; Rick Marks, editor of the Star; Brent Caruth, managing editor of the Star; and Dennis Burns, student director of the News Bureau, and the Magazine Yearbook, with William Rivera of the Office of Information, L.A. Board of Education; Marty Simons, assistant managing editor of the Star; Lee Hutson, editor of Sceptre magazine; and Roger Karracker, next semester's Crown editor.

## Eleven Seek Prom Queen Title

### Beauties To Appear Before Student Body Next Tuesday

BY MARTY SIMONS, Assistant Managing Editor

Valley students will be lured to the polls May 22-23 by 11 attractive Monarch coeds who are eyeing the crown of Valley College Prom Queen 1963.

All of the queen candidates will be presented to the student body on May 21 at an assembly in the cafeteria. Colleen Ferguson, commissioner of student activities and coordinator of the prom queen contest, will emcee the affair with various local comedians providing the entertainment.

Each candidate this semester is sponsored by a club and the clubs will introduce their candidates at the assembly. The new club sponsored program for Prom Queen candidates is expected to stimulate more interest among students.

#### Coronation at Prom

The Prom Queen coronation will be at the prom on Friday evening, May 24. The all-college prom will be in the Embassy Room of the Ambassador Hotel, 3400 Wilshire Blvd., in Los Angeles from 9 p.m. 'til midnight. All of the candidates will be presented with flowers and the queen will receive an armful of red roses.

Competing for Prom Queen are Vineta Ozolins, 18, language major; Joyce Knigge, 18, commercial art major; Dona Adams, 19, home economics major; Ann Tawara, 19, education major; Carol Johnson, 19, physical education major; Sandi Herbst, 18, business administration major; Kathy Luedtke, 19, pre-nursing major; Carol Sortomme, 18, mathematics major; Gladell Davidson, 18, education major; Donna Russell, 19, theater arts major; Jan Yacobellis, 19, education major; and Linda Bower, 19, journalism major.

#### Princesses Elected

Two princesses will also be elected in addition to the queen. Last year there were four princesses elected.

Queen candidates were required to circulate a petition for their nomination and had to secure 15 signatures. Deadline for the petitions was Tuesday. A meeting of all candidates will be held today at 11 a.m. in the conference room of the Administration Building. Rules concerning campaigning and publicity will be explained at this time. The candidates paraded in full force before photographers representing local newspapers Tuesday.

Last year's Prom Queen was Judy Dale, who was sponsored by Beta Phi Gamma, national honorary journalism fraternity. Last year's candidates were not required to secure club backing.

Polls will open at 10 a.m. on May 22 and will remain open until 2 p.m. Valley's night students will have the opportunity to cast their votes between 7-9 p.m. on the same day. Day students will be afforded another chance to elect their vision of loveliness on May 23 from 10 a.m. to 2 p.m.

**VYING FOR TITLE**—Prom Queen candidates, top l-r, Joyce Kingge, Donna Russell, Dona Adams, Carol Schenson, Linda Bower, Sandi Herbert, Ann Tawara and bottom row, l-r, Vineta Ozolins, Jan Yacobellis, Kathy Luedtke, Bobbi Wagner and Gladell Davidson vie for Valley's prom queen crown on May 22 and 23. Winner reigns at the annual Prom to be held at the Ambassador Hotel.

## 'Dwellers' Features Fantasy

"Cave Dwellers," a fantasy comedy written by William Saroyan, will begin its run Wednesday, May 22, with a faculty invitation performance. The play will continue May 23-25 with additional performances on May 30, 31 and June 1 in the Little Theater at 8:30 p.m.

The play presents a light fantasy approach to the life led by theatrical performers in an old abandoned theater. "Cave Dwellers" reaches beyond the ordinary realms of realism and with Saroyan's skilled playwriting, brings humor and pathos to the audience.

#### Riley Directs

"Cave Dwellers" will be directed by Patrick Riley of the theater arts department, and the cast will include the following Valley College actors: in the role of the King, John Ployard; the Queen, Deanna Levitt; the Girl, Sherry Beck; the Duke, Mike Cullen; the Father, Steve Marshall; the Mother, Osa Danam; the Boss, Joe Vierra; Jamie, Rick Elisman; as the Queen's Image, Fran Berg; and Gorky, Lee Preston.

Riley says of "Cave Dwellers," that "It's a play that must be executed about 18 inches off the ground."

The play itself deals with the central theme of survival through love as depicted through the make-believe, surrealist world of the actors.

#### Saroyan's Play

Last semester, Saroyan's play "Hello Out There" was presented by the theater arts department, and several other of his works have appeared at Valley.

Members of the "Cave Dweller" cast have also appeared in the following productions: Osa Danam in "House of Bernarda Alba," along with Deanna Levitt; Steve Marshall in "Hello Out There"; Mike Cullen in "Bus Stop"; and John Ployard in "Alcestis."

Admission to "Cave Dwellers" is free to students with student body cards and to faculty members at the May 22 invitational.

## Year's Outstanding Man, Woman Chosen

BY SHIRLEY PAUL, Club Editor

Valley's man and woman of the year have been chosen. Jo Frisbie, selected as woman of the year, and Lyle Maunder, chosen as man of the year, will represent Valley College in competition in the seven Los Angeles City junior colleges for citywide Man and Woman of the year choice.

Runners-up were Jack Easton, Mimi Elbaum, Flo Jarmula and Richard Ryder.

"It was a very difficult decision," said Mrs. Kathryn McCracken, assistant dean of student activities, "but we are represented by a very well qualified man and woman."

Miss Frisbie and Maunder were selected on the bases of:

#### Qualifications

- Scholarship: Outstanding academic achievement as evidenced by the completion of 30 or more units with at least a "B" (3.0) average in all work undertaken.

- Co-Curricular Activities: Evidence of service rendered through successful participation and effective leadership in student government, clubs, publications or special events of the college.

- Community Service: Successful participation in activities resulting in service to both the college and the community.
- Faculty Endorsement: Each candidate will present an endorsement by three faculty members from different departments.

- Written Statement: Each candidate will present a written statement of approximately two hundred words in which he will indicate his aims and objectives upon completion of his formal education.

#### Citizenship Ideals

- General Qualifications: Curricular and co-curricular activities are intended to provide each student with the opportunity to develop skills necessary for effective citizenship in a democracy. Such skills and attitudes should be assessed to include high personal integrity, ability to get along with others, pleasing personality, good appearance, effective manner of speech and expression and self-reliance.

Students on probation may register on the following dates:

I-L	Monday, May 20
M-Q	Tuesday, May 21
A-C	Wednesday, May 22
D-H	Thursday, May 23
R-S	Friday, May 24
T-Z	Monday, May 27

All students on scholastic probation must see their counselor before registering. They will not be allowed to register without evidence that they have had their education plans reviewed and approved. The Office of Admissions and Guidance suggests these students make their appointments now in order to avoid a long waiting period.

Freshman entered on probation may advance register only if their midterm grades are "C" averages or higher. Their midterm grade cards must be presented at the time of registration.

Students on probation may register on the following dates:

I-Q	Tuesday, May 28
A-H	Wednesday, May 29
R-Z	Friday, May 31

All continuing students who are eligible may register June 3-June 20. Students on provisional admission may not advance register but will be allowed to register in August if they have earned a "C" average or better on their final grades.

## SPRING SALE

A warehouse sale of items in the Student Book Store will be held May 20 to 24, according to Mrs. Violet Woodall, manager. Stuffed animals, luggage, books, paperbacks and composition notebooks will go on sale. All sweatshirts in the store are to be sold.

## Library Work Now Available

Students interested in applying for work in the library for the fall semester should fill out an application at the library and take the qualifying examination scheduled for Tuesday, May 28 at 11 a.m. in the Testing Center, B 15, according to Mrs. June Biermann, head librarian.

Hiring of students for the library will be done on the basis of their aptitude for the kind of work to be performed, their previous experience and the hours that they are free to work. This will be the only time the test will be given, said Mrs. Biermann.

## Election Approval Withheld

BY RICK MARKS, Editor

The greatest election in the history of Valley College met with a barrier of doubt Tuesday, as the Executive Council refused official confirmation of the 14 newly elected student body officers. The election committee's report was tabled pending further investigation.

At today's 12 a.m. meeting the Council will hear arguments raised Tuesday concerning the validation of the election, and alleged infringements and irregularities on the part of the Election Committee.

In an electrically-charged atmosphere Tuesday, Commissioner of Elections Bob Cons and his committee were confronted with charges of unethical election practices in six different areas.

#### Initial Charge

The initial charge was that of Cons' opening the ballot boxes Wednesday night, taking a personal count and releasing this information to at least one committee member. This Cons admitted doing.

Cons and his committee were also termed responsible for the late opening and early closing of the polls.

Further charges included the insufficient number of ballots available to voters, and lack of proper instructions given to poll workers on voter procedure in marking the ballot. It was pointed out that 106 ballots were discarded in the official count Friday as a result of incorrect stamping.

#### Disqualification Controversy

Additional controversy centered around Election Committee practices in the disqualification of candidates.

The Executive Council was presented with information that two former members of vice-presidential candidate Al Pepe's campaign, Anita Krohn and Paul Rime, advocated the disqualification of Pepe's two opponents, Jan Yacobellis and Sid Craig. This was done without any knowledge on the part of Pepe.

Rime, who brought charges against Craig which he later admitted as being false, was disqualified from the Election Committee by a faculty committee headed by Mrs. Kathryn McCracken, assistant dean of student

activities. The Rime charges led to disbandment of Craig's campaign committee, which is in direct violation of the Election Committee's jurisdiction.

#### Decision Again Reversed

Miss Yacobellis was disqualified from the election on charges that she had hung a banner illegally on campus. This decision was also reversed by the committee's faculty advisers.

Also under heavy bombardment were the dates on which the election was held, which were contrary to the dates set up in the constitution. However, it was argued that all candidates were knowledgeable of this fact, and that the Executive Council had certified the elections.

As charges and counter-charges flew about the room from accuser to the accused, it became evident that the Valley College Election Committee report, its acceptance usually standard procedure, will meet resistance until satisfactory answers are presented.

If the Executive Council fails to accept the report as presented, the possibility exists that Valley will be faced with a new election.

## College News Briefs

### Chem Students See Films

A total of 14 film series on selected topics in chemistry will be shown May 16, 21, 23, 28, June 4, 6, 11 at 11 a.m., Tuesdays and Thursdays in C 101. The subject matter of the films will coincide with what chemistry students are currently taking.

### Muslims in Short Visit

Three men attempting to sell the newspaper "Muhammad Speaks," the alleged official paper of the Muslim movement, were escorted off Valley College grounds last Thursday by campus police. The three left without protest when they were informed by two campus policemen that it was against school regulations for outside organizations to sell on campus without first obtaining special permission from school authorities.

### 'Hamlet' To Play Here

Shakespeare's immortal classic "Hamlet," starring Sir Laurence Olivier and Jean Simmons, will be shown in the Women's Gym on Monday, May 20 at 8:30 p.m. The five-time academy award winner will be the final presentation of the Athenaeum this semester.

## EDITORIALS

## Bonds — In Money We Trust?

It's more than a matter of economics at stake in the May 28 school bond election. More than we all realize.

A "YES" vote for Propositions "A" and "B" is more than an answer to the tragic prospect of half-day sessions for 157,490 Los Angeles students. It means more than the rehabilitation of 104 buildings, now housing school children, which are officially "unsafe in case of a major earthquake." It does more than provide classroom seats for 55,000 additional students.

It means more than lopping hundreds of thousands of dollars off school costs by acquiring land before prices skyrocket further. It does more than contribute to the community by the creation of jobs and the stimula-

tion of economic activity. It means more than the preparation of capable leaders in business, human relations, science—and national defense. Yes, much more than we all realize.

Yet, it will take more than money to maintain a superior school system in Los Angeles. The teacher is this system's backbone—and these bonds don't mean money to him. They mean an endorsement of what he is doing for our community. They mean unequivocal support — now and in the future — for our system and its leaders. They mean a vindication of his efforts.

It's more than a matter of economics at stake on May 28. It's a matter of trust.

—DENNIS BURNS

## Record Vote Despite Committee

Valley College students responded to this semester's student body elections in unprecedented numbers, and under any conditions they are to be congratulated.

Considering, however, the myriad adverse conditions created by the election committee, the student electorate deserves an extra pat on the back.

Bob Cons, newly appointed commissioner of elections, displayed a marvelous disdain for prior planning, and a genuine flair for mismanagement from ill-conceived beginning to premature end.

In all fairness to Cons, however, it would be remiss not to add that many of the blunders perpetuated during this election did not originate with Bob himself, but instead with his hand-picked election committee.

It is more or less traditional that the commissioner take the credit for his committee, so bend over, Bob.

The commissioner got the election off on the right foot by holding it in the wrong week. In the wrong week, that is, if the constitution which governs such trivia is to be a consideration.

Also not to be overlooked is the fact that the elections were held during the same time as Women's Week, which was, not incidentally, planned well in advance of the elections. This conflict served to lessen the re-

sponse to the well thought-out, well-executed Women's Week, thus negating much hard work.

Throughout the elections, the polls somehow seemed inevitably to open late and close early. At a special election committee hearing last Thursday, several candidates requested that the polling places be kept open until 10 p.m. instead of 9 p.m., thus affording the evening students more opportunity to vote. "No," declared the committee. It would violate the constitution, they said.

Perhaps the puppet committee didn't want more people voting, because, with typical foresight, they twice ran out of a very essential item at most elections—ballots. Dare say what might have happened with an even larger turnout.

Those fortunate enough to see a ballot found them most confusing. A vice presidential candidate expressed alarm at perhaps having voted for one of his opposition because he read the ticket incorrectly. Possibly this accounts, at least in part, for 106 ballots being discarded because they were mis-marked.

Yes, the students streamed to the polls as never before in the 13-year history of Valley. It should be safe to assume that never during these years has Valley ever had an election committee quite like this one.

## Special Classes Combat Mental Illness

Progressive programs to help educate and adjust the emotionally disturbed and mentally retarded child are recognized as a vital part of overall community advancement.

Throughout the San Fernando Valley and in outlying areas, classes are being conducted in public and private schools for individuals not capable of attending regular sessions, but who will benefit from special attention.

Private institutions cannot possibly handle the number of children who are in need of specialized training programs, nor can many parents stand the expense of private education.

Public instruction for the retarded is still in its primary stages, but plans to widen the scope of the programs are under the supervision of experts trained in handling problems associated with the mentally retarded.

Los Angeles City Schools provide diagnostic facilities for children and expert psychiatric and psychological guidance for mentally disturbed children between the pre-school and senior high school levels.

In the San Fernando Valley, five schools on the senior high level provide classroom

procedures geared for the special needs of the retarded.

Behind the training programs is the basic concept that all of the children are educatable to some degree and with the aid of experienced counselors and instructors, will achieve a certain amount of independence.

Public school facilities are definitely needed to offset the tremendous costs involved in educating the retarded individual. Los Angeles City Schools have allotted fixed amounts for the establishment of classes and counseling of parents and children, as well as financial assistance in transporting the children to and from the schools.

Further attention must be given to widen the program to include all children who fall in the category of the mentally retarded or emotionally disturbed, and to establish convenient educational centers.

The efforts of community leaders and those interested in seeing the advancement of general education, realize the importance of including the mentally retarded child.

—LINDA BOWER

## COMMENTARII

## Requiem for a Defeated Political Candidate

BY LEE HUTSON  
Copy Editor

Every baseball fan remembers Ralph Branca, the 20-game winner who etched his name in the long memory of infamy by throwing one pitch too many in 1951 and lost the Brooklyn Dodgers a pennant. Ralph, you see, was a loser.

The past decade, like all of the decades that have passed before, has spawned many noteworthy losers.

Adlai Stevenson, the egghead who twice bore the Democrats' banner in presidential campaigns and twice lost to a smiling, popular ex-general; Floyd Patterson, who made the almost fatal mistake of climbing into the prize ring one

summer evening with a man-mountain named Liston; and Dick Nixon, who wasn't content merely to watch television but decided to go on it.

Yes, these men were losers all. And now, I respectfully submit that I, too, am eligible to join this infamous lot. For those of you who

didn't know — and obviously a lot of you didn't — I recently ran for the office of student body president. I was what is laughingly referred to as a write-in candidate. I lost. Boy, did I lose!

I didn't pitch an errant fast ball, nor did I buck an old soldier. I wouldn't get near Liston without police protection, leave alone fight him, and I've never been on television. I simply lost an election to a fellow named Jack Easton — lost by almost 500 votes as a matter of fact, and if that doesn't qualify me as one of the all-time losers nothing ever will.

The bizarre conditions that ultimately led to my brief political existence actually began right here in the Star city room. It was late one night two weeks ago, and some "friends" decided that a write-in candidate would do wonders to stimulate a rather humdrum election.

Through a long process of elimination, they finally decided that I should be the goat, er, candidate. I was delighted. Imagine, I was to follow the path of glory blazed by Washington and most recently trod by Kennedy — I was going to be a president.

Gleefully I jumped on a desk top

and began to deliver a moving acceptance speech to my loyal followers — all four of them. "Oh, no," they moaned, "we've created a monster."

The next day a honest to goodness whirlwind election campaign started to roll. We printed 10 posters that never did get posted, and although I never made a speech, shook a hand or kissed a baby, I was not dismayed. The heat of the campaign seared my mind, and "election fever" pulsed through my veins.

The first night of the election, Easton and Flo Jarmula, the "other two" candidates, gave free coffee in exchange for free votes. Not us — we were ethical. We were also stupid. We gave nothing, and received the same.

The first night of balloting, my advisers advised, had gone against me. But the precincts were counting on — the "C" students, the athletes, the VALS — had not yet been heard from. Little did we suspect that these precincts couldn't write, and since I was a write-in candidate . . . well, that is another story.

Thursday, we moved into high gear. Parades, speeches, "lee girls," stuffed ballot boxes — all of the in-

TIME OUT—Shirley Ketchie, secretarial science major, takes time out from researching material gathered from Valley College's periodical room in the library. Magazines and newspapers can be obtained from the periodical section.

—Valley Star Photo by Charles La Bue

## Periodical Study Room Enhances VC's Library

BY NEIL LEIBOWITZ  
Staff Writer

The Periodicals Room stands in the southeast corner of the Valley College library. In it you will find a comprehensive pamphlet file, occupational information materials, maps, college catalogs and, of course, periodicals.

The subscription list of the Periodicals Room includes 17 newspapers, 541 magazines and journals and 20 indexes and abstracts. The periodicals are kept on file for a period of five years and then are replaced with microfilm. There are now about 114 different magazines on microfilm for a period of six years each. These can be read on a microfilm reader, or if the student wants a copy of the article to keep, the library can make a print of it for 10 cents per page.

There are 38 file drawers in the pamphlet collection. Each drawer is full of pamphlets on every conceivable subject.

The occupational file contains 12 drawers of information on educational requirements, opportunities, duties and the earning expectations of practically any career a student might be considering.

There is also a large file of the latest catalogs of over 600 colleges and universities, both American and foreign.

The 1962 Accreditation Committee, in its report on Valley College, stated, "Among the strong points of the library program were its comprehensive pamphlet file, its varied occupational information materials and its large number of periodicals, comparable to the list of a four-year college."

The room itself, has a seating capacity of 90, and there are over 200 items checked out a day. This is greater than the ENTIRE Glendale College library.

The indexes and abstracts kept in

the Periodicals Room make it possible for a student doing research to find all the recent information available. These indexes and abstracts appear difficult to use, but Mrs. Barbara Toohey, Periodicals Room librarian, or Mrs. Naomi Anderson, Periodicals Room library clerk, will be glad to explain them. At night, Mrs. Catherine Langford is on hand to help anyone.

In less than five minutes, a student can learn how to dig out information quickly and efficiently.

The faculty also takes advantage of the room. Mrs. Munns can often be found working with Moody's or the "Wall Street Journal." Dr. Vera Soper frequently checks out "Westermann's Monatshefte" and other foreign language publications. Irwin Porges does much of the research for books he is writing in the Periodicals Room.

Although serious study and research is the main idea for the room, it is also an excellent place to do reading for general information and pleasure.

## Illinois Discloses Pre-college Plans

URBANA, Ill., (I.P.)—A new program for advance enrollment of freshmen entering the University of Illinois next September has been announced by Eugene Oliver, assistant dean of admissions and New Student Week Committee coordinator of pre-college programs.

Advance enrollment to be conducted on a voluntary basis during the summer will provide entering freshmen an opportunity to choose courses and complete schedule before fall registration.

Each day of Advance Enrollment will include a general information session; a meeting with representatives of the particular college in which students plan to enroll; and a conference with an academic adviser of that college for actual selection of courses and schedule of classes.

On returning to the campus in September, the student will need only to pay his fees and complete other necessary details of registration. Enrollment in classes will have been completed.

## EACH CITIZEN'S VOTE IS IMPORTANT

## VALLEY FORGE

## Let's Try Something New in VC Elections

BY RICK MARKS, Editor

IT MATTERS NOT that the election just concluded had the largest turnout in Valley College history. There were so many flaws and mistakes, plus mismanagement and confusion, that it is a wonder that over 1,200 students found their way to the polls.

Few students really knew whom or what they were voting for.

If the popular election is to stay, then let's establish a definite election week pattern.

From Monday through Thursday of a specific week of the semester, all candidates would campaign with parades, rallies and speeches.

Then on Thursday, at the 11 a.m. activity hour, while election interest is at a peak, hold the election assembly, where all contested candidates give speeches.

AFTER THE ASSEMBLY all official campaigns on campus should cease. The polls would open, and students, now well informed, would cast their votes.

The polls would stay open all day Thursday, Friday, Monday and Tuesday. This would allow voting throughout every day and evening but Wednesday. If there is a runoff it would be staged Thursday and Friday, giving the candidates one day to campaign and allowing the paper to announce it in its Thursday issue.

With this type of setup, everyone is satisfied. The candidates can thoroughly inform the students of their platforms.

The students can evaluate the qualifications of the candidates throughout the three-day campaign period and assembly. The voter need not make any snap judgment, because campaigns and voting would be separated.

arate, and not suddenly thrust upon the student.

THE STAR WOULD be able to report all the election information with respect to its occurrence. Since the Star is published every Thursday, the ideal time for any event on this campus in relation to the Star is a Thursday. With this election format, the assembly and initial opening of the polls, plus run-offs, are held on Thursdays.

Some people may argue that the aforementioned plan would violate the constitution. But a quick check would indicate that the election just past had enough violations to defeat whatever faith anyone ever had in the college's constitution.

While we're on the election subject, something should be done concerning the tabulation of ballots. Candidates, the press and interested students are not allowed to watch the tabulation under the present setup. The count should be conducted in the Little Theatre, with periodic results posted.

THE ELECTION committee itself should be appointed by the dean of student activities and his assistant, along with the president of the student body and the president of the college.

If this entire plan fails, and it may very well do just that, then I for one advocate the abolition of the popular vote and election at Valley College. Take it from the students' hands, and place the selections in the hands of the administration of the college.

## LIONESS' PURRS

## Confusion Highpoint Of Smaller Airlines

BY BOBBI WAGNER, News Editor

If you have time to spare, go by air.

Travelers have recently taken up this slogan because of the inadequacy of several of the smaller commercial airlines and many complications involved in planning even the simplest flight nowadays.

FOR INSTANCE, an individual wishes to make a reservation on a certain airline for two days following to San Francisco.

His first step is to call the air terminal and be connected with the reservation clerk.

His first step turns out to be his first mistake. He is put in contact with an overseas airline who tries to tell him that there is no San Francisco in Germany. When he finally reaches the right desk the reservation clerk is out to lunch, but will return within the hour.

After several more false starts he reaches the reservation clerk at last. Then the marathon starts. Instead of

him asking her questions, she barges him with such questions as, "Does he want to fly turbo-prop or jet, first class or tourist? Does he want a morning flight which includes breakfast or an afternoon flight which doesn't serve lunch but does provide sandwiches?"

BY THE TIME the traveler has made all the necessary choices it's too late to make arrangements to send the luggage ahead because the luggage clerk has gone to dinner.

The following morning finds the traveler at the airport trying to check in his luggage. He is relieved to find one person in front of him. However, this person is trying to send an elephant gun to his brother in Africa and can't decide whether to ship it air freight or air express.

By the time the reservations are made and the luggage checked in, so much time has been wasted that it would have been easier to take a train.

MANY AIRLINES have their operations run smoothly and efficiently. Even the problems of last minute cancellations, transferring flights at several destinations, handling non-ambulatory passengers and many other services are taken in stride and carried out to the satisfaction of their passengers.

However, there are several smaller airlines which, possibly through no fault of three-fourths of the personnel, are poorly organized and cause inconveniences to the passengers.

THESE SMALL inconveniences could easily be cleared up by more and better organization plus a little better planned operation.

# Bond Election Scheduled for May 28

## No Increases In Tax Rate Anticipated

The Budget Division of the Los Angeles Board of Education reports that "there will be no significant change in the school tax for bond redemption and interest" for school construction proposed by Propositions "A" and "B."

Construction under the program would cost the average taxpayer \$25.60 per year, according to Dr. John F. McGinnis, director of the Educational Housing Branch of the board.

The average taxpayer in Los Angeles County owns a home with a market value of \$18,000 to \$20,000 and an assessed valuation of \$4,000, reported a September 1962 study made by the Los Angeles Times.

The equation concerning Proposition A and B may be solved in the following manner: Each "yes" vote on A and B equals a step taken to attain the maximum level of quality in education. Each "no" vote on Propositions A and B will result in a delayed repercussion effect on nearly 157,000 students who will be forced to go on half-day sessions by 1966.

Projecting the viewpoint of a pessimist, if the A and B bonds are not approved, the fund deficiency will have the following effects on Los Angeles schools by 1966:

Students in elementary schools — 38,046 of them — or 9.9 percent of all pupils, will be forced to go on either half-day or shortened sessions.

### Forty Per Cent

Without additional classrooms by 1966, 55,592 students in the junior high schools — or 40.4 percent of all pupils — will have to change to the modified half-day or shortened sessions.

"I don't envision a clean-cut double day session," said Henry Dyck, principal at Ulysses S. Grant High School. He added that it would be necessary to have additional periods in order to accommodate a larger student body if Propositions A and B are not approved.

Hardest hit by the effects of the school bond issue, if not approved, will be 64,473 pupils in the senior high schools — or 49.8 percent of all students, who will receive a short-changed education because of the modified shortened or extended day programs.

"If the school bonds are not approved, then the high schools might have to go on an extended day program such as the one presently used in the colleges," said Dyck. He added that if such a program were chosen, students might have to attend classes from 7:30 a.m. to 5, 6 or 7 p.m.

### Transportation Problem

"Both the extended day and double day sessions would cause parents difficulties in terms of the transportation problem," said Dyck. Other instructors have indicated that the transportation problem would especially effect those parents who have more than two youngsters attending different schools.

"It is mass chaos transporting my seven children to school, with three of them in grammar school, two in junior high and two in high school," said Mrs. Elizabeth Nemeth. She added, "If the schools went on double day sessions, I would have to be a full time chauffeur."

In a recent interview with 20 mothers who had two or more children attending school, each parent disapproved of the idea of a double or extended day session. The two facts which seemed to disturb them the most were the transportation problem and the revision of breakfast, lunch and dinner schedules to meet the needs of each child when he or she returned from school.

"I'll vote 'yes' on the bond issue just to avoid a double or extended day session," said one mother. She added, "I can just picture John and Linda at school while Bill, Tim and Judy are at home. Why, that's as

(Continued on Page 4)

1962-63 was 64 cents per \$100 assessed valuation. At this rate, which the Budget Division reports will remain unchanged, the cost per year for the average taxpayer comes to \$25.60 on property assessed at \$4,000.

Previous tax rates for school construction have been 64 cents per \$100 assessed valuation for bonds issued in the years 1959, 1961 and 1962. The rate was set at 51 cents per \$100 assessment in 1960.

### Bonds Maturing

Taxes now being paid to retire school district bonds will not increase since bonds now maturing are paid off at approximately the same rate as new bonds are sold. This program is similar to long-term financing in home purchases.

Since 1959 the Los Angeles City School Districts have expended \$289 million in building new schools. There has been no increase in the tax rate for redemption of these bonds, according to Dr. McGinnis. This includes a bond issue of \$153 million approved by city voters in November 1960.

The bond plan for financing construction enables the school system to build facilities for immediate use, while paying for them over a period of 25 years.

Included in Propositions "A" and "B" are projects totaling \$20.5 million which will be ready for immediate construction. These are projects for which funds were provided in the 1960 bond issue. The building program is scheduled to continue with the preparation of plans and specifications already completed.

These facilities would be built and occupied by students from one year to two years earlier than would have been the case if the entire project had been financed from one bond issue.

## Tax Ass'n Endorses Bonds For First Time in History

For the first time in the history of bonds for schools, the California Taxpayers Association is in full support of the issue.

Although the California Taxpayers Association never came out against a school bond issue, it has never before, until 1963, endorsed one.

According to Max Benton, school consultant for the California Taxpayers Association, "We have checked into the bond issue very carefully, and we fully endorse it."

Benton gave his reasons as follows: "The public must recognize the results of a great avalanche of school students that would occur unless adequate school classrooms are made available immediately.

"If the bonds fail, we will be so far behind in school building that the community would not be able to put up the necessary money that would eventually be needed."

### No Luxuries Planned

Benton went on to say that the California Taxpayers Association has looked into the bond issue with great care and "we have come to the conclusion that the money will be utilized to the full extent on only necessary needs" (Swimming pools, etc., are classified as unnecessary needs.)

The North and East Valley Associated Chambers of Commerce have also endorsed the bond issue, according to George Brudney, chairman of the Associated Chambers of Commerce.

Brudney stated that if the bond measures fail to pass, the city school system will see a half-day sessions increase from 14,00 to 40,000.

### Chambers Give Support

Other organizations that came out in favor of Propositions A and B are the West Valley Chamber of Commerce, the East Los Angeles Chamber of Commerce, the Parent Teachers Association (Districts 10 and 31, which are part of the L.A. City School System), the West Los Angeles Chamber of Commerce, the East Woodland Hills Chamber of Commerce and the AFL-CIO Central Committee.

Their reasons were much the same as those of the California Taxpayers Association and the North and East Valley Chamber of Commerce.

**MANY TALKS**—One of the more than 500 talks on the bonds is given by Superintendent Jack P. Crowther to an interested organization. Crowther speaks an average of four times per week.

## Bond Proposal Gives Earthquake Protection

Early in 1961 Iran suffered a major earthquake which literally swallowed up 3,000 people. The effect of this quake was felt not only in Iran but here in the United States. The cause of this major disaster was due to faulty construction of buildings and schools.

Schools in Los Angeles are now similarly faced with the same problem. At this moment, there are 104 masonry buildings declared unsafe due to faulty construction. Unless acted upon now to correct this precarious situation, an eventual and probable disaster may maim and even kill youngsters while sitting behind

a desk in a condemned school classroom.

However, there is no need to go to Iran for earthquake facts. The Los Angeles City School system presents facts clearly enough to its citizens. Propositions A and B will rectify the present precarious situation.

### Two Self-Explanatory

The two bond proposals are self-explanatory. To the everyday citizen of Los Angeles County, Propositions A and B are special bond issues for construction of essential, urgently needed classrooms and other educational facilities. The bond proposals are designated to build 1,537 classrooms, purchase land for new sites, expand over-crowded school sites, and permit replacement or structural strengthening of 104 masonry buildings declared unsafe in case of a major earthquake.

The people in favor and giving their support to the bond proposals are doing so because it is necessary to accommodate school children in safe, sound classrooms and schools.

The design standards and building code for public school construction in California have been substantially the same since 1933, although details of the code have been revised several times. This revision took place after the passage of the Field Act, which regulates design and construction of public schoolhouses throughout the state. This act was passed as a result of the poor structural behavior of existing school buildings in the major earthquake of March 10, 1933.

One can only tend to draw this conclusion: Schools and classrooms were declared unsafe in 1933 and are still to this day not properly built to satisfy to a major extent the requirements of law. This code has been in existence exactly 30 years.

### Some Declared Unsafe

At this very moment there are 104 masonry buildings which have been declared unsafe in case of earthquakes. If conditions are not improved, and improved soon, in case of earthquakes, many innocent children may die needlessly because of faulty construction.

The seven additions to the Tehachapi Elementary School constructed under the Field Act, were among the buildings shaken during the 1952 quake. Several were of re-inforced concrete frames and walls, one of steel and concrete "tilt-up" construction and one of wood frame and stucco. There was some plaster cracking but no structural damage. Plaster cracks were pronounced where the ceiling metal lath was turned down along sides of concrete roof or ceiling beams.

### Roofs Leak Rain

In the assembly unit the roofing was cracked sufficiently to cause leaks during a sudden rain on July 29. Many of the reflectors from the lights had fallen to the floor. Books slid from cases and shelves. Considering the extensive damage to masonry, commercial buildings two blocks distant, it is gratifying to note the excellent behavior of the plant's construction.

The structural failure during earthquakes emphasize the need for competent and continuous inspection during and after construction. This is not intended to infer that contractors are unwilling to construct buildings in accordance with plans and

specifications, but competent inspection is an added safety factor. The desired result of placing Propositions A and B on the ballot is to insure absolute safety to school children while in their classrooms.

## Elementary Schools Need More Space

"At this time a total of 15,070 elementary school pupils are attending classes on half-day sessions," stated Jack P. Crowther, Superintendent of Schools for the Los Angeles Unified School District.

Of this total, 2,293 are attending condensed study periods in the San Fernando Valley. With the Valley's population boom, the problem is becoming more pertinent every day.

By 1966 the total city-wide will be 157,000. That is why the voters of the district will go to the polls on May 28.

In the valley, a total of 11 schools are now on half-day sessions. The student half-day population in these schools is 2,293. By 1966 the projected number will be over 7,000.

To ready the schools for the population influx, the superintendent stated, "Certain changes must be made in the best interests of serving all pupils."

In speaking with four of the principals of these 11 half-day schools in the Valley, the Star received more insight on the problem.

At Capistrano Avenue School in Canoga Park, the principal, W. P. McDaniel, stated, "next semester our

## Student Publication Asks for Awareness

BY MARTY SIMONS  
Staff Writer

Faced with rapidly rising school enrollment and inadequate facilities, Los Angeles City School students have laid their problem, their future, on the table and have asked the citizens of their city to help them secure an adequate education.

Elementary school students cannot expect anything but an overwhelming vote in favor of Propositions A-B on May 28. To his mind the problem is simple. There are 35 students in his classroom that was built to hold 30. The walls of his classroom have been declared unsafe in case of an earth-

quake. Can there be any opposition to improving these conditions?

The junior college student who is plagued by many of the same needs considers a yes vote for the school bonds nothing short of one's duty as a citizen of his city and country. But the JC student has become acquainted with the voting habits of his parents and neighbors.

Public apathy has continually prevailed over election issues and will continue to do so unless citizens are informed of the issues and impressed with their need.

### Apathy Problem

The school bond election faces just this problem. The only solution is to make voters aware of the problem that exists in their school system. Many voters will go to the polls completely unaware of the existence of this problem and the necessity for its correction.

In past elections a large group of uninformed and unconcerned voters traveled to the polls for the express purpose of defeating all bond issues regardless of their purpose. It is this group that has created the need for complete participation of informed, conscientious voters. The school bond, like all proposed bonds, requires a majority vote of two-thirds to pass.

These voters will make their appearance at the polls again this year in an attempt to deprive the Los Angeles City School System of 21 new schools, 1,434 new classrooms and the wood and cement to fix classrooms that have been declared unsafe. These needs have long passed from a state of desirability to mandatory. They are desperate needs that cannot be overlooked, forgotten or put off until next year.

### No Tax Increase

The proposed school bond will not raise taxes. Many voters cast this off as being impossible—How can a bond provide for so many improvements and not raise taxes? The answer is simple to those who take the time to listen. The same bonds which have advanced the L.A. City School System to its present level are being paid off at the same rate the new bonds will be issued. Yet some voters, unaware of this situation, will oppose the school bonds because of a mistaken belief that they will raise taxes.

There is a need for more classrooms. The need is growing at a cancerous rate. It would surely be comforting to sit back and assume that the City School System could dip into its vast resource of funds and build new classrooms. Those who advocate this are like the man with sufficient funds who suddenly finds himself penniless and is not able to accept the fact that there just isn't any money left. The need is there—the money is not.

Los Angeles Valley College journalism students have prepared this bond information newsletter. It reflects the point of view of people who are directly concerned with the existing problem. People who bear the burdens of its needs and people who spread its benefits to the people of their city, state and nation.

While writing on this matter it was hard to avoid "pleading" and "begging." Convinced that an informed public will recognize the urgency of their problem and correct it, their only "plea" is awareness.

### College Addition

## English, Science Buildings

The fate of Valley College's proposed \$800,000 humanities and behavioral science buildings will be in balance until the outcome of the May 28 bond election. The \$800,000 was the portion allotted to Valley out of the total \$10,000,000 which was to be allotted toward junior colleges. In the San Fernando Valley, the junior colleges, elementary, junior high and high schools will receive \$30,236,000. The bonds will be used for purchase of land, buildings and

equipment and rehabilitation and alterations. The bonds cannot be used to buy supplies or to raise teachers' salaries.

If the bonds are passed, they will supply Valley College with six English classrooms. English classes have met in bungalows since the school started. Bonds also will furnish two speech rooms and four social studies rooms in the humanities building. The behavioral science building will contain one anthropology classroom,

one sociology room, two general lecture rooms which will seat 108 people each, one physiological psychology lab and four general classrooms which will be used mainly as psychology rooms.

### Birth Rate Increases

The increase in the birth rate is the determining factor on whether or not there is a need for additional classrooms. In 1960 a total of 202,800 babies were born in the Los Angeles area, 71,000 in 1963 and an expected 80,000 to be born in 1970.

Donald W. Click, dean of the evening division, commented that "before 1959, most of the population in the San Fernando Valley came from out of state, but now the migration is being done within the Valley. Also California is receiving 1,500 people a day and six out of 10 live in the Los Angeles School District.

### Valley's Population Grows

Because of the constant growth of San Fernando Valley, more facilities will be needed on campus to handle the expected 5,200 day students and 8,000 evening students in the fall semester. At present Valley has 4,844 day students enrolled and 7,346 evening students. In the next three years there will be a 6,500 increase in the total junior college population.

"WE NEED BONDS"—Superintendent of Schools Jack P. Crowther speaks to the Citizen's Committee for Proposition A and B at Rodger Young Auditorium last Tuesday.

## Bond Passage Necessary For Social Improvement

BY BRENT CARRUTH  
Managing Editor

Apathy poses the greatest barrier to passage of Bond Propositions A and B, which will spell out the conditions in the educational program in California, according to Valley College's William Lewis, junior college bond coordinator.

"There is actually no one single opponent to the bonds, but people must get out and vote," Lewis said. "We are united in the belief that Governor Brown's statement that education keeps California green is correct. Right now education is facing its severest test and passage is important."

### FACTS ON BONDS

What are they: Funds to provide for 678 new elementary school classrooms, 756 high school classrooms, and 103 new junior college instruction rooms.

How much: \$127,500,000 for elementary, junior and senior high schools, and \$10,000,000 for junior colleges.

When: In the May 28 elections. Propositions A and B are the school bonds.

## Grade School Classes Sought

(Continued from Page 3)

school, with a population of 1,400 will have three B-1 and A-1 classes on half-day. If the bonds do not go through, by 1966 one-half of our 35 classrooms will be used for teaching half-day students."

With four groups of children at Vaughn Street School in San Fernando now on half-day session, the problem of Principal Gerald Gottlieb is here now. "In two or three years, there will be eight more rooms holding four double sessions if Propositions A and B fail."

In Woodland Hills, Oso Street School (which is one of the newest in the city) is also faced with the problem of cramped conditions. The school only has a student population of 675 pupils, yet is on half-day. Two groups of B-1 pupils are using one classroom at this time. If the bonds pass, the problem will be alleviated.

Hubbard Street School in Sylmar, with the large influx of population in that area, has one of the biggest split session problems. The school has a student population of 1,610 with eight and a half classrooms housing half-day sessions.

Next year the total of half-day sessions will go up to 14. By 1966, if the bonds fail, the school will have at least two-thirds of its students on half-day sessions.

Principal Charles Montague wishfully states, "If the bonds go through, a new school will be built one mile east of our campus and 10 new classrooms plus two kindergarten buildings will be built at our school."

If the bonds fail, it is possible that the school will be entirely on half-day sessions by 1966.

Pointing to the problem that will face California's youth unless Propositions A and B pass, Lewis remarked that 150,000 children will be on half day sessions within two years.

The great need for the bond passage can be shown by the increased amount of publicity being given to this year's movement. In the last bond campaign 56 talks were presented in contrast to 501 speeches delivered at this point.

**Work As A Family**  
"The high school that I went to was relatively modern when I went there, but now they are badly in need of funds to re-modernize their buildings. During the years they have not required money for construction they have always voted for bond passage, but now they need help from the other communities," said Lewis.

"We have to regard ourselves as a family and have to work as a family. Communities that do not need re-modernization now or whose schools are adequate should realize that some day they will need financial help," Lewis said.

He said that 1,100 onlookers responded favorably to this answer at a rally held for interested people at a junior high school where no significant construction is needed. "Some day they will need help and then it will be up to the other areas to help them."

Unlike what many people think, the bond issue is an important one. For failure would mean that students will be turned away, the substandard "temporary buildings" will remain and Valley won't be able to provide the specialized programs that are presently offered.

**Won't Hike Taxes**  
"No, taxes won't be in the least bit affected by the bond passage," explained Lewis. Drawing a chart to explain his reasoning, he said, "Bonds are sold and retired periodically. One issue of bonds will be retired this year and for that reason if another set were to be sold they would merely take the place of the retired ones."

Another factor that would be favorable to taxpayers is the fact that all the money would not be immediately allocated to construction. The money would not be used until it is needed, according to Lewis.

WILLIAM E. LEWIS

"The problems that are the most critical will get the immediate care," according to the bond coordinator. "The bond money given to Valley will be distributed first for an English-Speech building and for a Physics department."

Concluding the interview Lewis said, "There are 250,000 voters who are registered, and it takes two-thirds of the people who vote to win the bond election. All I hope is that all of the 250,000 turn out to vote."

## Classrooms Cost Less Than Homes

"It only costs \$13.50 a square foot to build and equip an elementary school in the Los Angeles unified school district, whereas it costs \$15 and up to build the average home, and that figure doesn't include the costs of furnishing the home," stated George H. Womble, the college supervisor of education housing for Los Angeles.

On May 28, the voters of Los Angeles will head for their voting booths for the General Municipal Election and decide whether or not Propositions A and B — the special school bonds — will be passed.

**New Rooms Needed**  
Because there is a need for 1,537 new classrooms from the elementary to the junior college level, the bond issues must pass.

"Los Angeles builds her schools \$2 per foot under the national average for construction costs," says Virgil Volla, the associate superintendent of schoolhouse planning and construction for L.A. schools. And Los Angeles builds schools at 10 per cent less than the maximum allowed by law under the state aid program.

In fact, most of the school districts in the state are under state aid and build at the maximum allowed. When a school district expends a maximum effort on raising money to build a plant, the state will step in and help.

**Builders Economize**  
Los Angeles has always been able to build her plants without going to the state aid program. In Los Angeles the average square foot ratio is only 75 square feet per student, and on the state level the average is 100 square feet per student.

"The main reason for L.A.'s success in keeping the square footage down is that we build larger schools, and they are better managed," according to Valley College dean of student activities William Lewis, who is also in charge of coordinating the Los Angeles junior college bond information center.

It only cost the average home owner \$25.60 last year for the bonds that are already sold, and if the propositions are passed the entire \$137,500,000 asked for would go directly for the purchase of land, the building and equipping of new plants and for rebuilding the unsafe old school buildings without a raise in taxes.

# CivicMindedCitizens Rally Behind Propositions A, B

A kick-off bond rally for 70 coordinating councils of the Citizens' Committee for School Construction, comprised of parents, PTA members, community-minded groups and citizens met at Rodger Young Auditorium in Los Angeles Tuesday. Their

purpose was to determine effective methods for obtaining passage of Propositions A and B in the May 28 bond election.

Speaking to the assemblage were Mrs. Georgiana Hardy, a member of the Board of Education; Frederick

Larkin, chairman of the Citizens' Committee, and Jack Crowther, superintendent of L.A. City School System. Television producer John Gudel acted as master of ceremonies. Crowther welcomed the assemblage, followed by Mrs. Hardy, who was the

main speaker. That the Board of Education has both conservative and liberal members and that many times they are divided was pointed out by Mrs. Hardy, who spoke not only as a member of the Board, but as a representative of the Building Committee. In this particular bond issue, she said, the board was unanimous in its approval.

In her discussion of the building program, she mentioned the fine planning utilized in construction of all facilities and the money-saving practices used by the Construction Division of the Board of Education in having master plans to build new schools and making multi-purpose rooms. She informed the audience that new elementary schools will be without cafeterias and auditoriums; praising Reed Smoot as a "very conservative building contractor who makes sure everything is done right."

### Chambers Endorses Bonds

"A tremendous 'grassroots' approval from all groups has been evidenced," she stated, also noting that the Chamber of Commerce who represents the businessman and keeps abreast of current development, as well as dissecting every expense, had gone over the building program and enthusiastically endorsed it saying, "We think this is a must — no frills involved." Another group, the California Taxpayers Association, which has never endorsed anything like this before, has said, "This is an 'austere' bond, and we endorse it." The real estate boards have also added their approval.

### Acceptance Required

"In the past the schools felt it was their job to get out and pass the bonds; now we are switching the issue to the citizens' role, because it is the citizens' schools," she stated. She said in many instances, enterprise and business can turn people away, but the school system cannot turn any child away, but must accept him.

The problem of accepting children with the increasing shortage of classrooms means that there will be a great number of students on half-day sessions. If the bond measure is not passed, by 1966 there will be more than 157,000 students on half-day sessions, including for the first time, students in senior high schools, she advised.

### New JC Planned

Of the total \$137,500,000 bond issue, \$10 million is specifically for the Junior College District, which includes additions and improvements to six of the seven junior colleges, plus the start of construction of a new junior college facility.

Larkin stressed the importance of getting to the polls, because he thinks there will be a small runoff in some areas, while only one or two charter amendments, Propositions A and B, and council candidates running. He said that people should understand the issues and the need for the bond and convey this need to their neighbors via telephone, postcard and visitation to overcome the apathy resulting from the lack of a "glamorous" political ticket.

## Double Sessions Promise Chaos

(Continued from Page 3)

bad as summer vacation without a rest period."

Another mother had this to say about the extended day program, "I could just see the battle rage if I tried to wake one of my teen-age daughters for a 7:30 class while the other slept until their 11 a.m. class. This divided time schedule would only mean trouble at our house."

"At Grant we have a compact schedule with students receiving instruction at the same time," said Dyck. "The extended day or double day sessions would pose another major problem. With students coming and going constantly on different schedules, the extended day session lends itself to the loiterer, who would roam the halls while classes were in session," he added.

Instructors on the junior high and high school level believe that the extended day sessions would disrupt the academic atmosphere with part of the student body roaming around campus.

These are only a few of the problems which will exist by 1966 if the school bond issues are not approved. The primary purpose of the A and B propositions is to improve Los Angeles' City School System as it grows to serve the mounting population. It will be up to the voter to determine the importance of Los Angeles' educational standard.

It is the voter who provides the educational activities for the citizens of his city — his vote eventually reflects the thinking of that city.

## DO YOU KNOW WHAT SCHOOL BOND FUNDS ARE USED FOR?

## 1 Million Out of Work Due to Education Lack

The most disquieting fact about American economy is the group of nearly a million persons who have been jobless for over 15 weeks, regardless of the state of the economy. This is mainly due to their lack of education.

There is a growing consensus in the United States that from now on the labor force will be experiencing the dislocation of technological change. A man may have to learn new occupations more than once. For the poorly equipped who lack educational and vocational resilience, this leads to unemployment.

While only 1.8 percent of professional workers are unemployed, 8.7 percent of unskilled workers are jobless, as are 6.6 percent of the semi-skilled.

Due to lack of education, teenage boys, who have dropped out of school, have flooded the labor market with 12 percent of the unemployed for over the past four years. The prospect of 26 million entrants into competition for work during the 1960s with about a third of them unequipped is downright scary.

Statistical abstracts of the United States show the income of males 25 or over is controlled by the amount of education they receive. The annual average income, as of 1958, is shown below:

Elementary Education	
less than 8 years	\$2,551
8 years	\$3,769
High School	
1 to 3 years	\$4,619
4 years	\$5,576
College	
1 to 3 years	\$6,966
4 years	\$9,206

The lifetime earnings are as follows:

Elementary Education	
less than 8 years	\$120,965
8 years	\$169,976
High School	
1 to 3 years	\$198,881
4 years	\$241,844
College	
1 to 3 years	\$305,395
4 years	\$419,871

Those who complete eight years of elementary education earn \$47,000

## CLUBS

# Board Member Chambers Speaks on Valley Campus

"I'll gladly debate any Communist speaker publicly at any time," said J. C. Chambers, a senior member of the Los Angeles Board of Education, Tuesday in a quadrangular presentation sponsored by the Young Republican Club.

However, Chambers said that he was opposed to such campus speakers as Dorothy Healey, who is under orders by the government to register as a representative of a foreign power.

"They are our enemies," he said. "There is no reason to spend tax dollars to dignify them."

Chambers said that he was in favor of the loyalty oath.

"It is the only defense against Communism that the school system has at such an important level as teaching. Communists can take an oath of allegiance to the United States, because they consider the United States a Russian satellite. However, they cannot take a negative oath, in which they deny affiliation with the Communist Party."

Chambers further stated that all high school and college student body presidents are placed on a Communist mailing list. Then they are flooded with propaganda under the guise of peace literature — such as the Bulletin of the World Council of Peace, which says, "Cuba, Si—Yankee, No."

Communists attempt to influence the youth because they are natural crusaders, and they differ with their elders on many questions. Therefore, youth can be more easily influenced by the Communist ideas.

Chambers defined Communism with an example. He said that in feudal times the lord would take over the land and say, "As of now I own

your farm. You farm it now, and in the winter months I'll give you what you need." This is Communism today.

On the other hand, he defined America "as a free society in which the mechanized feudalism of Communism is unable to compete with the free society we have today. We actually have the Marxist's dream of a free society, while the Communists have what Marx feared—the loss of liberty to the individual."

The Communist philosophy is so strong, that it says—where an organization that influences society exists—"penetrate it," and if one does not exist—"create one."

"We must be on the alert to get to the source of this propaganda, and be constantly on guard against it," Chambers said. "The Communists are trying to force their ideas upon us."

Chambers says that Communist infiltration in schools poses a definite threat. "We must realize that the problem exists," he said.

## German Club Plans Members' Hay Ride

The German Club will sponsor a "hay ride" and cookout for members only on Saturday night, May 18, at Hansen Dam Stables, 11127 Orcas, Lake View Terrace. Admission is \$1 per person.

Members interested in attending may meet in front of the Foreign Language Building at 7:15 p.m., or may go directly to the stables, but must arrive there before 8:30 p.m., when the hay ride will begin. Each individual must bring his own food for the cookout, to be held at the stables from 7:30 to 8:30 p.m.

There will be no meeting Tuesday, May 21, because of the Queen Contest. However, the club will convene Tuesday, May 28, in FL 104 at 11 a.m. An election of officers is scheduled.

## Yacobellis Elected Coronets President

Jan Yacobellis was elected president of Coronets in the election held May 13. The results of the other officers elected are Rita Klein, vice president; Flo Jarmula, secretary; and Kay Cost, treasurer.

Coronets are holding an applicants' tea on Sunday, May 19, at the house of Bobbi Wagner, 4725 Cedros Ave., Sherman Oaks.

Voting on all new members will be held on Monday at the weekly meeting.

## Hillel Council Hosts Picnic for Valleyites

The Hillel Council will have a picnic Sunday in Ferndell Park. The picnic will begin at 11 a.m.

Highlighting the afternoon's festivities, coed softball and football games are planned. There will also be egg tossing contests, pie eating contests and three-legged races.

The entire student body is welcomed and reminded to bring soft drinks and lunches. There will be free dessert.

Because of the current racial inci-

dents in the South, the council is presenting Dr. Max Heyman who will lecture on "Integration." It will take place at 11 a.m. in P 100.

Sandi Herbst was selected as the council's candidate for the Prom Queen.

## Foreign Language Club Reactivates

Alpha Mu Gamma, national honorary foreign language society, is being re-activated on campus. A student doesn't have to be presently enrolled in a language, but has to have had it at one time and have an A or B average to join.

There will be a meeting today at 11 a.m. in FL 102.

Students can speak with Jay Merson, French instructor, today at 1 p.m. in FL 105.

## Les Savants To Hold Meeting, Elections

Les Savants will hold a meeting tomorrow night in the Student Center at 7:30 to elect next semester's officers and to listen to their guest speaker, Frederick Machetanz, testing coordinator.

## Art Club Continues Slide Presentation

The Art Club will sponsor part two of a lecture entitled "Beast in Art" by Harriet Baker, associate professor of the art department, today at 11 o'clock in B 62. With the use of slides, Mrs. Baker will continue to explain the use of animal motif in art through the years.

## MONARCHS MEET

**TODAY**

11 a.m., Occupational Series, VABS, Marketing Research, Arthur J. Shaw, C100

11 a.m., Intramurals, Men & Women's Gyms, Field House

11 a.m., Prom Queen Candidate Meeting, A112

12 noon, Executive Council, Student Center

3-5 p.m., Shakespearean Tea, VC Experimental Theater

4-9 p.m., High School Journalism Day

**FRIDAY**

8 a.m.-4:30 p.m., Computer Club Open House, B56-58

7:30 p.m., TAE, Student Lounge

**MONDAY**

8:30 p.m., Athenaeum Museum Film, "Hamlet," Women's Gym

7-10 p.m., Evening Student Bond Committee, Banquet Rooms, Cafeteria, thru Thursday, May 23

**TUESDAY**

11 a.m., Campus Concert, Original Compositions & Arrangements by Students, Choral Room

11 a.m., Math Seminar, E101

11 a.m., IOC, Student Center

11 a.m., Intramurals, Men & Women's Gyms, Field House

11 a.m., Prom Queen Candidates Assembly, Cafeteria

12 noon, Executive Council, Student Center

**WEDNESDAY**

10 a.m.-2 p.m. & 7-9 p.m., VOTING FOR PROM QUEEN CANDIDATE

2 p.m., AWS Board, Student Center

**SPEAKER ON CAMPUS**—Virginia Cotton, J. C. Chambers, and Carol Sortomme, l-r, pose following Chambers' speech to Valley students Tuesday. Chambers spoke on the political pressure put on college students today. He was one of several speak-

ers being sponsored by campus clubs this semester. Miss Sortomme is presently the president of the Young Republicans, the sponsoring club for the speech.

# Computers Enslaved by Humans

BY BRENT CARRUTH  
Managing Editor

The electronic beast, termed as man's modern-day employment menace, will be enslaved to work complex problems for onlookers Friday at the Computer Club's day-long open house.

Valley's beast, which is housed in B56 and B58, is a \$130,000 calculating machine, having 20,000 core storage positions or the equivalent number of human cells.

Headed by President Robert van Tiehl, the 10-man computer club hopes students will come to the computer rooms any time during the day and view the marvels of the machine. "We hope to interest students in our computing program at Valley," said van Tiehl.

## Machine To Perform

According to the club president, the machine will be trained to do problems almost like a slave in the following fields at Friday's open house. The machine will work a resultant of forces in a physics problem. A club member will order the computer to solve a difficult engineering problem. The machine will group data on female college students and will reveal "choice" statistics. A gas

law chemistry problem will be worked.

The computer will find the length of a curved line by chopping it into a million slivers. A calculus problem dealing with interest and money paid back on a loan will be solved within 45 seconds.

Speaking about the machine van Tiehl said, "The computer types out the information needed to solve a certain problem. After getting the information it works the problem much quicker than a human can."

## Open House

The open house will be set up so that students can come in any time during the day and ask the person running the computer to work any one of the problems. After the solution is given, it will be awarded to the person asking for the problem.

"We invite anyone to try to work a problem faster than the machine," chuckled van Tiehl.

At present there are only 75 students taking classes in computing, and with the increasing use of computers in business there is an ever-increasing demand for trained programmers, according to the club's president.

"In order to serve this need, Valley College owns some very expensive equipment and employs some high caliber instructors to teach programming. Every semester well-trained students are graduated with computer experience; however, this number nowhere reaches the demands of industry," said van Tiehl.

Pointing to the monetary side, the president said that \$125 per week is the approximate starting salary for a person who can program.

Also featured at the open house will be a color movie which deals with computing. The movie is open to all interested students.

Clockwise from bottom: Jet-smooth Chevrolet Impala, Chevy II Nova 400, Corvette Sting Ray, Corvair Monza Spyder

## Summer's coming, get going!

If this isn't a great time to get yourself a new Chevrolet—well, we just don't know when is. Why, you'd almost have to be anti-summer not to let one of these four convertibles get to you. Or any of Chevrolet's sedans, wagons, sport coupes and sport sedans, for that matter.

And there are a lot of other buy-now reasons besides the season. Like the care-free feeling you get on

a long vacation trip in a brand-new car. And it's a smart time to trade, what with your Chevrolet dealer all stocked up for a busy summer. Chances are, he

has just the model and color you want — be it Chevrolet, Chevy II, Corvair or Corvette—ready to go right now.

So maybe now you're all wound up? Then spring into summer at your Chevrolet dealer's.

LAWRENCE FINK  
Scholar for May

## May Scholar Named by Committee

Valley College's scholar of the month of May honors went to fourth semester student Lawrence Fink, who was so named last Friday by a student scholarship committee.

Fink, who is an engineering major, has compiled a 3.6 grade point average after 56 units of work. For the last two years Fink has made the Dean's List after each semester.

In addition to going to school, the 24-year-old Air Force veteran works part time driving a school bus for a private school. When informed that he was chosen scholar of the month, Fink said, "I am thrilled that the committee saw fit to choose me, and I am deeply honored."

As for his future, Fink plans to attend Valley for one more year and then transfer to the University of California at Berkeley. After graduation he intends to work in the engineering field, but he is not yet quite sure as to what particular phase of engineering he will attempt.

## LOOKING FOR A HIGH PAYING JOB?

Want to earn up to \$200 a week or more? Compete, too, for \$2000 in Scholarship Awards and other prizes? Get valuable training in a field in which many leaders in business and industry got their start? Put your college education to work before graduation? It's all possible for qualified college students. Apply now to one of the finest publishing companies in the United States. For more information see your Placement Director, or write to:

# Women's Athletic Teams Advance Into Tourney Play

BY NANCY SCHAEFFER, Staff Writer

As defending champions, Valley's women's swim team enters the All-Junior College Swimming Tournament today when they travel to Orange Coast College to meet with 20 other colleges for the afternoon event. Nine events are scheduled with medals for individual winners and a trophy for the winning school.

The Monarchs finished the Metropolitan Conference season with an undefeated record, splashing by El Camino in their last meet 47-31. Also with perfect record, the women's softball team enters the All-Junior College Softball Tournament being held on different campuses this week.

## Lions Came From Behind

Trailing El Camino going into the final inning 12-7, the Monarchs rallied for six runs Monday to come out on top 13-12.

In the first inning against El Camino, the Lions were in front 2-0, but that was the last time that the Warriors were behind until two singles, a double, a triple and a home run were belted by the Monarchs in the final frame. Nancy La Val, president of the WAA, was responsible for the home run which gave the Lions their fifth straight win of the season. Peg Hickman was the winning pitcher and Angie Gomez was the loser for El Camino.

Second place was taken by the Monarchs last Friday in the Southern California Junior College Archery Tournament. A team of five, three men and two women, met at Pasadena with 14 other schools.

Valley's Dorothy Cromwell placed fourth in the women's division, and

## RELAY TICKETS

Discount tickets for tomorrow evening's Coliseum Relays are on sale at the Business Office. The regular \$2.50 seats are being made available to Valley College students for only \$1.

The Relays will feature Olympic competitors Jim Grelle, Jim Beatty, Peter Snell, Dyrrol Burleson, and others who promise to break meet, national and world records.

Gary Shirley took fourth in the men's division for Valley.

San Bernardino was first in overall competition, and East Los Angeles was third. The competitors shot Columbia rounds which consist of 24 arrows fired from distances of 30, 40 and 50 yards.

## Hopkins, Cogert and Fenton Compete

Completing the squad for the Monarchs were Betty Hopkins, Alan Cogert and Roco Fenton.

Last Saturday the women's tennis team went to the semi-finals in consolation play in the Southern California Junior College Tennis Tournament. Sharron Deckman and Lee Nolte reached the semi-final division for the Monarchs in competition held at Long Beach.

**IRON MAN ROCK**—Valley College's indestructible Rusty Rock displays the iron cross on the rings as the Monarchs placed second in the Southern California gymnastics finals last Friday at Long Beach City College.

# Baseball Squad Ends Year in Wild Game

BY STU ORECK, Sports Editor

Valley's Johnny Jones, who is usually one of the best fielding shortstops in the Metropolitan Conference, couldn't find the handle in the eighth or ninth innings against Long Beach last Friday and the Vikings pushed six runs across to defeat the Lions 11-6 on Pike Field.

Jones was not alone in his fielding problems. His teammates made eight errors that accounted for seven unearned runs. The Vikings committed four themselves.

The season finale saw a total of 17 runs, 21 hits and 12 errors. Leading the Valley attack with three hits apiece was Steve Malter and Chris Putnam.

**Lions Jump on Top**  
Steve Ariga opened up Valley's half of the first inning with an infield hit and moved to second on a wild pitch by Viking Stan Sunderman. Putnam then lined a single to left, scoring Ariga, but Putnam was cut down stealing. After Jones tripled Spencer Akins ended the rally with a pop fly to second baseman John Gonsalves.

With a 1-0 lead, the Monarchs picked up another run in the second inning. But in the top of the third, Long Beach put together three hits and two walks for four runs. Score, 4-2.

The Monarchs came right back in the third with three runs on three hits. Putnam, Jones and Akins contributed hits to the cause. Akins doubled to drive in two of the three runs.

**Ball Goofs**  
Starting Lion pitcher Gary Ball picked up a slow roller down the first base line and threw it away. Viking Downey Thomas ended up at third

# Pasadena Tops VC In Final Gym Meet

BY TED WEISGAL, Staff Writer

At the Southern California JC Gymnastics Championships last Friday, Rusty Rock led the Monarchs to within 12 points of the nation's top junior college team, Pasadena. Earlier this season Valley fell to PCC by over 100 points, but this time Pasadena won, 106-94, in the Southern Cal meet.

Rock pushed the Monarchs to their second place finish by winning the all-around event. On his way to the all-around victory he won both the high bar and parallel bar events, placed fourth on the rings and eighth in free exercise.

On a possible 10-point system Rock came up with a 9.225 average in the four events.

Rock picked up scores of 9.65 for the high bar and 9.20 for the parallel bars.

The Valley sophomore led the way with his performance, while the three other Monarchs followed suit with outstanding performances.

## Sturdivant Wins

Ted Sturdivant kept his near perfect side horse record intact—he has lost only once this year against junior college competition—with a win in the event. He got scores of 9.2, 9.2, 9.3 and 9.4 to average 9.25 in defeating Santa Monica's Rod Hempt by one-half a point.

The brother combination of Fred and Doug Washburn also came through with sparkling performances.

Fred placed third in free exercise, seventh in parallels, third in long horse and second in tumbling.

Doug placed fourth in the trampoline and sixth in tumbling.

To place second the Monarchs had to defeat such conference rivals as East Los Angeles, Long Beach and Santa Monica.

## Lions Place in AAU

Competing in the Southern Pacific AAU meet last Saturday night in the Valley College gym, the Monarchs placed second to the Olympic studed Los Angeles Turners.

The foursome of Rock, Sturdivant and the Washburn brothers in competition against Jack Beckner and Armando Vega placed in every event except the rope climb.

Rock paced the Valley contingent

# Lion Intramurals Have New Look

Intramurals at Valley College have taken on a new look this week with every athletic coach conducting interclass competition in a different sport.

The competition is conducted between physical education classes and is on Tuesday and Thursday at 11 a.m. Coeducational classes will also enter teams in competition.

The different sports available are archery (coed), badminton (coed), tennis (coed), volleyball (coed), basketball, weight training, and softball.

## Metro Standings

GOLF—Final				
	W	L	T	Pct.
El Camino	14	0	0	1.000
Valley	7	4	3	.697
Santa Monica	7	7	0	.500
San Diego	6	6	2	.500
Long Beach	6	6	2	.500
Bakersfield	6	7	1	.464
East Los Angeles	6	8	0	.428
Cerritos	0	14	0	.000

BASEBALL—Final

Santa Monica	6	14	.300	
East Los Angeles	5	16	.233	
Valley	3	18	.142	

# Trackmen Compete In So. Cals

Eight Valley College athletes will attempt to hurdle their last barrier on the way to the state meet at Modesto when they travel to Mt. San Antonio College for the Southern California Junior College track finals this Saturday. Field events get under way at 6 p.m. and the running events at 8 p.m.

Out to improve his 1962 third-place two-mile finish, Dick Krenzer has his sights on the national record of 9:05.1. Krenzer will also run the mile in which he has turned in the second fastest time ever run by a JC athlete, 4:08.0.

## Irons Slight Favorite

Valley's Dave Irons (14.3 non-winning in 120 high hurdles), who is still hampered by a muscle pull, will have to put on the talent if he wants to beat San Bernardino's Bunny Brown and Mt. Sac's Carl James (14.4).

Lion sprinter Herman Harville (9.4-20.8 wind assisted) will have his hands full when he meets up with Long Beach's Tim Russell and San Diego's Ray Alexander in the 100. Sprinter Stan Emery, who is recovering from a muscle pull in his foot, is capable of upsetting some of the best in the sprint field if his foot can hold up.

Otis Burrell (6-10½) will be out to get Long Beach's John Rambo (6-11½), Orange Coast's Mike Lang (6-7¾), Riverside's Tom Quast (6-7½) and Bakersfield's Dick Jones (6-7¾) in a heated dual in the high jump.

## Lion Dark Horses

Valley's dark horses who could pull upsets in their events and who will be out to give the Lions added points are Bill Boyd (49.6) 440, Steve Sheppard (1:55.2 relay leg) 880, Sy Ornstein (6-6½) high jump and a mile relay team.

Last Saturday at Fresno, Valley broke two school relay records when a two-mile team composed of Krenzer, Sheppard, John Tanner and Marvin Murray was clocked in 7:49.0 and Boyd, Sheppard, Murray and Krenzer turned in a fast 10:08.3 for the distance medley. Both relay teams placed second.
